

sheet about 2 inches apart. Bake in moderate oven,
375° - 10 to 12 minutes. These cookies should
not brown.

I dropped from teaspoon instead of rolling -
375° was too hot for my oven. I baked at
325° my bottom oven (rite), came out perfect.

I did refrigerate dough before baking -

May make a glaze of cherry juice + powd. sugar.

After frosted and want to freeze spread cookies
out on cookie sheets in single layer + put in
freezer for 15 min. to 1 hr. Then store to freeze -
will not stick together + frosting will stay great.

new stone!

used 350° oven - great 10 min
